About me

Dedicated and efficient full-stack developer with 2+ years of experience in application layers, presentation layers, and databases. Experienced in both front-end (F/E) and back-end (B/E) technologies. Spearheaded a successful transition from the MERN stack to the MEAN stack, which cut latency by 40% and increased the effectiveness of database administrators by 20%. Seeking to further improve HTML5 and CSS3 skills as a future full-stack developer at Atmospheric Solutions

Interests

- new tech stacks
- problem solving
- machine learning
- sports
- music
- team work
- praying

Farm2Global

Full-stack developer

a passionate Full Stack Developer dedicated to creating impactful applications that empower communities, like those served by Farm2Global. With a strong foundation in both frontend and backend technologies—from crafting responsive, intuitive interfaces with React to building scalable backend solutions in Node.js and Django—I focus on delivering seamless experiences for users. My work with Farm2Global reflects my commitment to using technology for positive change, helping to connect farmers with global markets through innovative, secure, and user-friendly solutions. I'm always excited to learn and adapt to new challenges, driven by the goal of building platforms that make a meaningful difference in people's lives.

Education

2023 Sep - Present

Rwanda Coding Academy
Software development and embedded systems

2019 Jan - 2023 Aug

Kagarama Secondary School
O-level
